### Flash Drives!

All students will need to have the ability to save and transport their files.

Every student at Correia will receive an account on WebLockrz to safely store and access their own files. This service is free to all students.

Most students, however, prefer to store their files on a flash drive. This allows students to store and access files faster. They are also very convenient for transporting their files from computer to computer. Flash Drives are about \$10-\$20 for storage sizes under 2GB. Most stores that sell computer accessories carry flash drives. You can also find good deals on Amazon.com and NewEgg.com. We would recommend students having a flash drive with at least 512mb capacity.
